

Explore Our Cloud Products

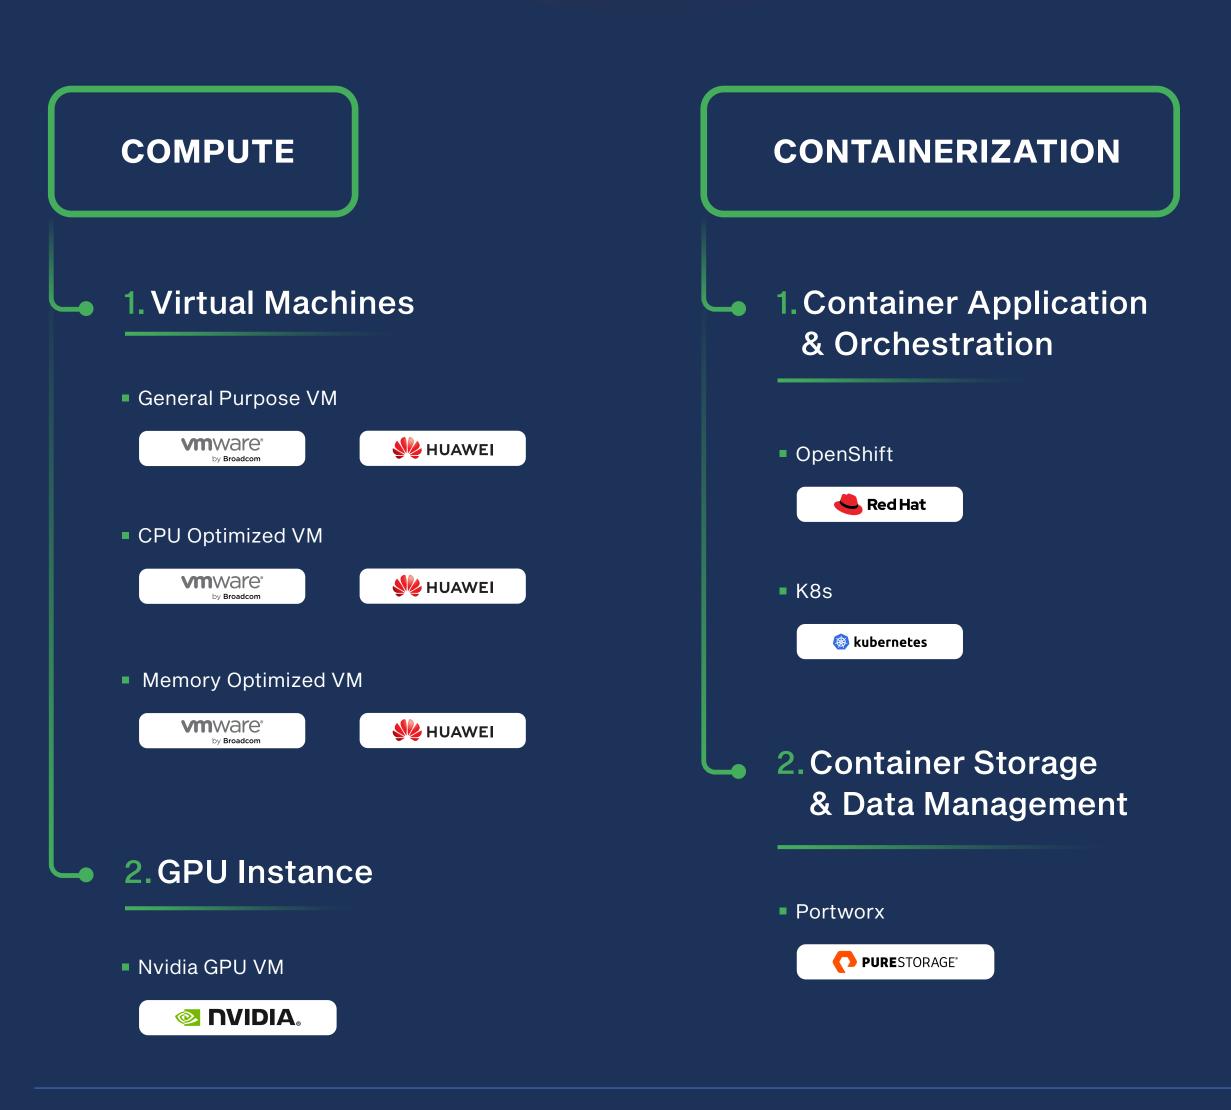

1. COMPUTING & PROCESSING

Powerful computing resources that drive performance for diverse workloads, from basic tasks to high-performance computing, ensuring efficiency and speed at scale

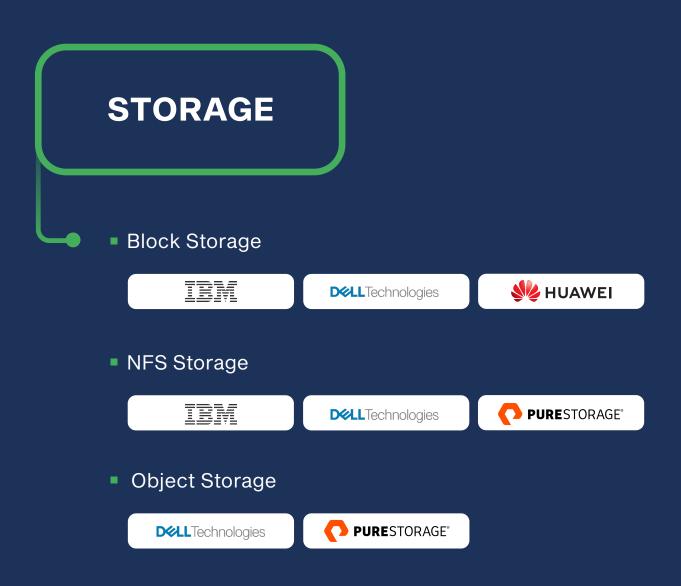

2. STORAGE SOLUTIONS

Flexible and scalable storage options that adapt to your business needs, providing secure and reliable solutions for data-intensive applications and long-term archiving.

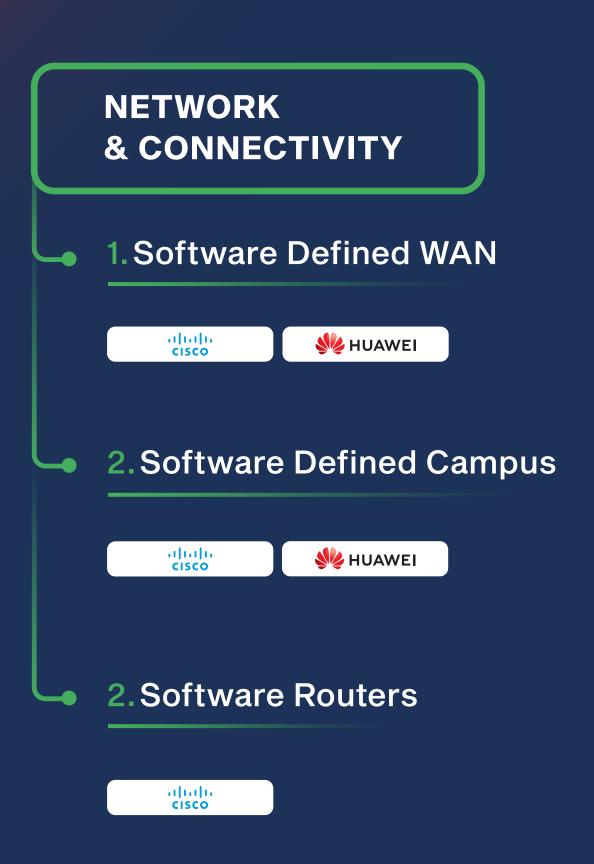

3. NETWORK & CONNECTIVITY

Secure and seamless connectivity across your network, empowering your business with fast, reliable, and secure access for all users, anytime, anywhere.

4. DATABASE SOLUTIONS

Reliable database solutions optimized for high performance and scalability, empowering your applications with seamless access to structured and unstructured data.

■ 1. Relational Database ■ MS SQL ■ Microsoft ■ PostgreSQL ■ PostgreSQL ■ MariaDB ■ MariaDB ■ MongoDB ■ mongoDB.

5. DATA PROTECTION & RECOVERY

Comprehensive data protection that safeguards your critical information, with advanced recovery options to ensure business continuity in any scenario.

6. OPERATIONAL AND INFRASTRUCTURE MANAGEMENT

Efficient infrastructure and security management tools that enhance operational oversight, ensure optimal performance, and streamline IT service delivery.

1. Application performance Monitoring

2. IT Service Management

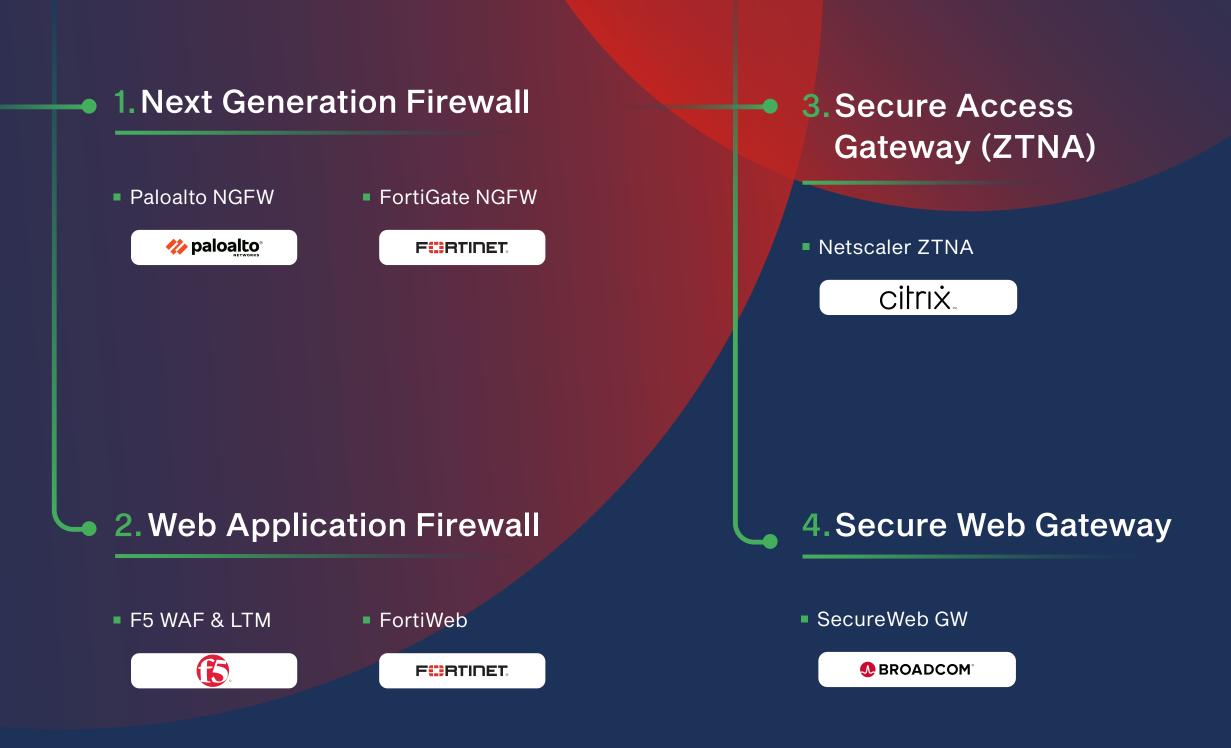

7. SECURITY PRODUCTS

A comprehensive suite of security solutions that protect every layer of your digital ecosystem, ensuring data integrity, compliance, and robust threat protection.

- 5. Multifactor Authentication (MFA)
 - Duo MFA

cisco

- 6. Endpoint Protection & Encryption
- Endpoint Security

SOPHOS

- 7. Server Protection
- Server Protection

SOPHOS

- 8. Secure Access Gateway (ZTNA)
- NetScaler ZTNA

citrix

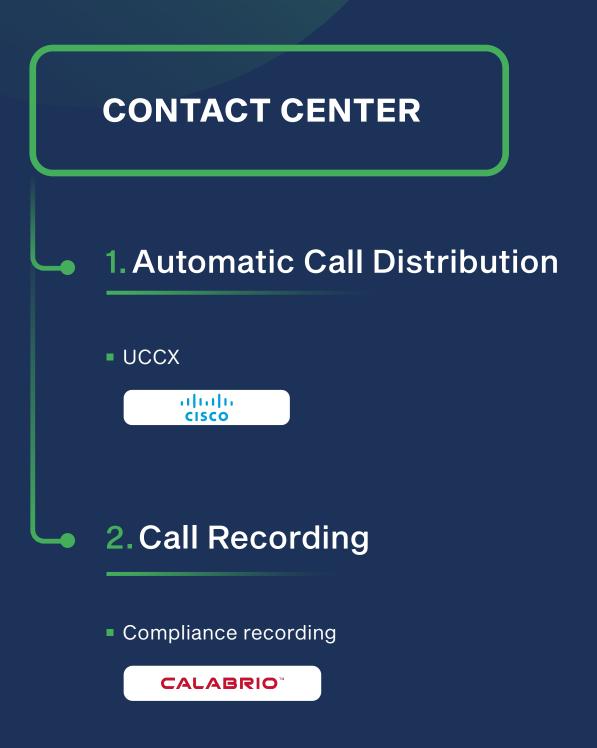

8. USER EXPERIENCE & COLLABORATION

Enhanced collaboration and communication tools that bring teams closer together, fostering productivity and connectivity across all devices and locations.

9. END USER COMPUTING

Powerful end-user computing solutions that enable seamless access to applications. Our offerings ensure productivity, security, and scalability, empowering your workforce with flexible and efficient resources.

10. CUSTOM PRODUCTS ON DEMAND

Explore Our Value Added Services

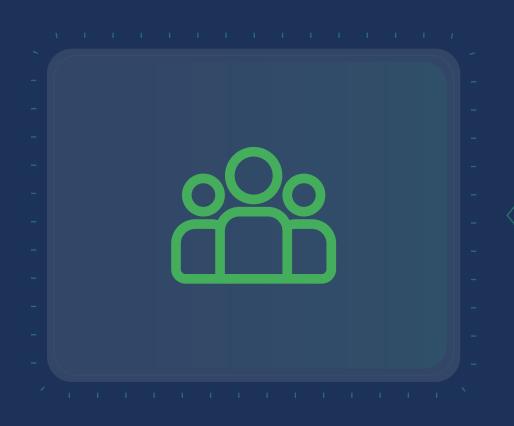

VALUE ADDED SERVICES PORTFOLIO

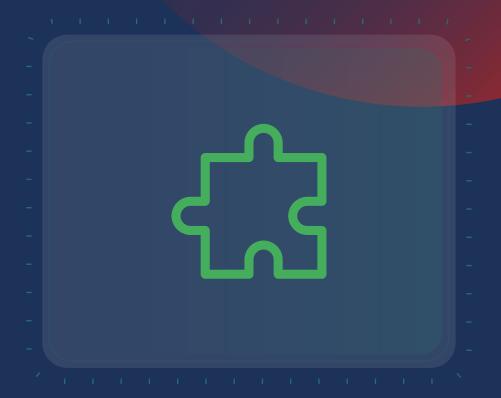

Consultation

Solution
Architecture and Design

Professional and Migration Services

Operational Management and Optimization

Our managed services provide end-to-end Cloud management solutions, from design and implementation to ongoing support of complex environments.

1. CONSULTATION

Our services provide a tailored roadmap to help organizations harness cloud technology, enabling strategic, informed decisions that align with business

SERVICES

Workload Assessment

Assessing each workload's technical and business requirements, ensuring it aligns with the appropriate cloud environment.

Cloud Deployment Model Selection

Offering expert guidance in selecting the most suitable cloud deployment model

Risk & Compliance Assessment

Providing analysis of risks associated with cloud migration and ensure compliance with industry-specific regulations.

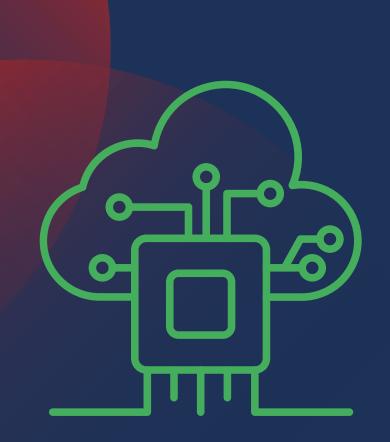

TCO & Benefit Analysis

Conducting Total Cost of Ownership (TCO) and benefit analysis to provide a clear financial and operational view of cloud investment

2. SOLUTION ARCHITECTURE & DESIGN

Our services deliver customized, secure, and scalable cloud architectures, tailored to support long-term success in Multi-Cloud environments.

SERVICES

Solution Architecture Design

Designing a robust architecture that spans multiple cloud providers.

Security & Compliance Planning

Designing comprehensive security frameworks for Multi-Cloud ecosystems.

Disaster Recovery & Backup Design

Designing disaster recovery and backup solutions.

3.PROFESSIONAL & MIGRATION SERVICES

We provide expert support at every stage of your Multi-Cloud migration journey, ensuring a smooth and precise transition.

SERVICES

Multi-Cloud Environment Setup

Setting up the cloud environment across multiple cloud platforms.

Data and Application Migration across Multi-Cloud

Ensuring a smooth and secure transition of data and applications across cloud platforms.

Multi-Cloud Integration Services

Facilitating seamless integration of systems across cloud environments.

4. OPERATIONAL MANAGEMENT AND OPTIMIZATION

Our services provide continuous monitoring, optimization, and resource management to keep your cloud environment secure, cost-effective, and high performing.

SERVICES

Solutions Management

End-to-end management of products and services across environments, ensuring consistency and reliability.

Proactive Monitoring & Observability

Continuous monitoring of cloud environments to identify and resolve issues proactively, ensuring full observability for quick response and minimized downtime.

Performance Optimization

Regular analysis and tuning of resources to maximize performance, reduce latency, and enhance user experience.

Explore Our Al Services

1. DISCOVER THE WORLD OF AI

What is AI?

- Artificial Intelligence (AI) is when machines mimic human thinking — understanding, learning, and making decisions.
- From chatbots to recommendation systems, Al is already shaping the way we live and work.
- Al now includes Generative Al, which can create text, images, or audio, and Agentic Al, which can reason, make decisions, and take actions to achieve goals

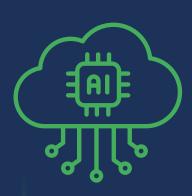

How Does It Work?

- Al learns from huge amounts of data and identifies patterns
- It relies on complex models (like neural networks) to make predictions or generate answers
- These models are trained using powerful GPUs and massive computational resources far beyond what regular computers can handle.

Why It Matters?

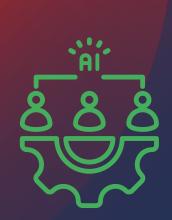

- Al boosts productivity, automates routine tasks, and supports smarter decisions.
- It's transforming industries like Governmental, Agricultural,
 Financial, etc.

2. AI SOLUTIONS POWERED BY EFINANCE

Public Sector Solutions

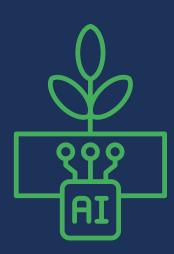

- Fraud Theft Detection Detects anomalies in fraud withdrawals to combat fraud and misuse.
- Strategic Commodity Tracking Monitors the flow of goods with AI-powered insights.
- Enterprise Knowledge Management System
 Extracts structured data from unstructured such as legal investigation files.

Agriculture

AgriTech Al Guidance
 Recommends optimal farming decisions based on environmental data satallite imaging and crop type.

Customer Service & Communication

 Al Voice Agent
 Arabic-speaking assistant for automating inbound and outbound calls.

E-Chat Interface Internal web-based chat UI with your enterprise data.

Automation & Operations

Al Automation Platform
 A unified solution for workflow automation and orchestraion, enabling systems and teams to operate seamlessly through Al-driven logic, smart triggers and process intelligence.

Al Infrastructure & Enablement

Local LLM Deployment
Secure, OpenAl-compatible large language model hosted on-premises.

3. E-CHAT: THE GATEWAY TO AI AT EFINANCE

Overview

- E-Chat is an internal AI chat interface built on locally deployed LLM.
- Provides a simple, secure, and intuitive way to interact with Alusing natural language (Arabic & English).
- Acts as the bridge between teams and enterprise data,
 empowering non-technical users to explore Al capabilities.

Key Benefits

- No coding required anyone can ask questions, analyze text, or test Al logic.
- Secure by design runs fully on-premises within eFinance's cloud.
- Supports rapid prototyping helps teams test use cases before full product integration.
- Multi-lingual ideal for Egyptian government and Arabic-speaking users.
- Brings Al closer to business, legal, ops, and customer service teams.

Use Case Value

- Accelerates Al adoption across departments.
- Helps validate real-world Al use cases before development.
- Supports training, workshops, and internal enablement on LLM technologies.
- Enables data privacy-focused Al exploration.

Discover Our Success Stories

1. EGYPTIAN TAX AUTHORITY

eFinance Cloud hosts the **ETA's** core tax ecosystem - including the national e-Invoice and e-Receipt platforms - which has processed over **3.4 billion** electronic documents to date.

We deliver the cloud infrastructure that ensures this strategic, nationwide system runs with high performance, security and resilience.

eFinance Cloud – Powering Egypt's Digital Tax Transformation.

2. GOV-CA

eFinance Cloud successfully designed and built the Government Certification Authority **(GOV-CA)** private data center — the core infrastructure that enables Egypt's trusted digital identity and electronic signature ecosystem.

The solution delivers high security, availability, and compliance, empowering **GOV-CA** to issue and manage digital certificates for government entities across Egypt.

eFinance Cloud — Building the Foundation of Trusted Digital Government.

3. MISR TECHNOLOGY SERVICES

Misr Technology Services (MTS) operates the NAFEZA Single Window Platform on eFinance Cloud Infrastructure, ensuring secure, reliable, and efficient digital management of Egypt's trade operations.

eFinance Cloud — Enabling National Digital Transformation.

4. PUBLIC PROSECUTION OFFICE

The Public Prosecution Office **(PPO)** website is securely hosted on eFinance Cloud Infrastructure, ensuring high availability, performance, and data protection for Egypt's judicial digital services.

eFinance Cloud — Enabling Secure Digital Government.

5. MINISTRY OF JUSTICE

eFinance Cloud hosts the Al-powered Speech-to-Text System for the **Ministry of Justice**, enabling the digital transformation of court session records through advanced voice recognition technology.

This national project supports the automation of judicial procedures, enhancing efficiency, transparency, and accuracy across Egypt's courts.

eFinance Cloud — Enabling Smart Justice Transformation.

6. NATIONAL ORGANIZATION OF SOCIAL INSURANCE

eFinance Cloud designed and implemented a private data center for the National Organization for Social Insurance (NOSI), providing a secure and scalable infrastructure to host and manage Egypt's national social insurance systems.

This infrastructure ensures high availability, data integrity, and operational efficiency for millions of citizens' services.

eFinance Cloud — Empowering National Digital Infrastructure.

7. EGYPTIAN DRUG AUTHORITY

The Egyptian Drug Authority **(EDA)** relies on eFinance Cloud Infrastructure to host and manage multiple digital environments, ensuring reliability, scalability, and compliance for Egypt's national pharmaceutical regulation systems.

eFinance Cloud — Powering Secure and Compliant Digital Operations.

8. NATIONAL INVESTMENT BANK

eFinance Cloud provides Disaster Recovery as a Service (DRaaS) to the National Investment Bank **(NIB)**, ensuring business continuity, data protection, and operational resilience for critical financial systems.

eFinance Cloud — Safeguarding Egypt's Financial Infrastructure.
